INTRODUCTION: THE JOY OF GIFTING ON STEAM

Gifting a video game is one of the most thoughtful ways to celebrate a friend's birthday, congratulate a coworker on a promotion, or simply show someone you care. For millions of PC gamers, Steam is the go-to digital storefront, and learning **how to gift games on Steam** is easier than you might think. Whether you want to surprise a fellow player with the latest blockbuster or a

hidden indie gem, Steam's gifting system is built to make the process quick, secure, and personal.

In this comprehensive guide, we'll walk you through every method available, from direct purchases to sending digital Steam gift cards. We'll also cover common pitfalls, privacy settings, and regional restrictions so you can avoid any hiccups. By the end, you'll be confident in your ability to send the perfect game to anyone in your Steam friends list.

HOW TO GIFT A SPECIFIC GAME

METHOD 1: HOW

a Gift

DIRECTLY

The most straightforward way to answer the question **how to gift games on Steam** is by purchasing a game as a gift for a specific Steam friend. This method works flawlessly when you know exactly which game the recipient wants.

Step-by-Step: Buying a Game as

1. **Log into your Steam account** via the desktop client or the Steam website.
2. **Navigate to the game's store page** you wish to purchase as a gift. Use the search bar or browse through categories.
3. **Click "Add to Cart"** as you normally would. On the cart page, you will see an option labeled "Purchase as a gift." Select that option before proceeding to checkout.
4. **Choose the recipient** from your friends list. If they aren't on your friends list,

you can also enter their email address – though adding them as a friend is recommended to avoid delivery issues.

5. **Personalize the gift** by writing a short message. Steam will attach this message to the gift notification email. You can also choose a specific delivery date if you want the gift to arrive later.

6. **Complete the purchase** using your preferred payment method. Steam will process the transaction, and the recipient will receive a notification that they have been

gifted a game.

Once the recipient accepts the gift, the game is added to their library. They can choose to decline it as well, in which case the game is returned to your inventory for future gifting or refund.

Important Things to Remember

- **Regional restrictions:** If you and the recipient are in different countries, the game may not be giftable due to pricing or licensing differences.

Steam displays a warning before checkout.

- **Friend for at least three days:** To prevent fraud, Steam requires you to have been friends with the recipient for at least three days before you can send them a direct gift. If you are not yet friends, consider adding them early or using an alternative method like a gift card.
- **Gift sent via email:** If you choose to send via email, the recipient must redeem the gift within 30 days. After that, the gift expires and you get a refund.

METHOD 2: SENDING A STEAM DIGITAL GIFT CARD

Sometimes you aren't sure which game the person wants, or you want to give them the freedom to choose themselves. In that case, the best answer to **how to gift games on Steam** is a Steam Gift Card. These digital cards function just like cash in the Steam Wallet.

How to Purchase and Send a Gift Card

1. Open the Steam client or website

and go to the
**“Steam Gift
Cards”**

category. You
can find it under
the “Cards”
menu at the top
of the page.

2. Choose between
a digital gift card
sent via email or
one that you can
print at home.
For instant
delivery, the
email option is
best.
3. Select the
amount you wish
to gift. You can
choose from
preset values
(e.g., \$5, \$10,
\$25, \$50, \$100)
or enter a
custom amount.
4. Enter the
recipient’s email
address. You can
also add a
personal
message to

make the gift
more thoughtful.

5. Set the delivery
date if you want
the gift card to
arrive on a
specific day. This
is great for
birthdays or
holidays when
you want the
surprise to hit at
just the right
moment.
6. Complete the
purchase. The
recipient will
receive an email
with a code they
can redeem in
their Steam
Wallet.

The beauty of a
Steam Gift Card
is that it works
regardless of
friendship
duration and
regional
restrictions. The
recipient can
then use the

wallet credit to buy any game they like, including those on sale during seasonal events.

METHOD 3: GIFTING FROM YOUR STEAM INVENTORY

If you already own a game and have an extra copy sitting in your Steam inventory (for example, from a bundle or a duplicate purchase), you can gift that copy directly. This is another way to answer **how to gift games on Steam** without spending additional money.

Steps to Gift from Inventory

- Open your **Steam Inventory** by clicking on your profile name and selecting “Inventory” from the dropdown.
- Find the game you wish to gift. It will appear as a “Gift Copy” item.
- Click on

ING STEAM'S

item and then select **"Send Gift"**.

- Choose a recipient from your friends list or enter their email address.
- Add a message if desired, and confirm the gift.

Note that not all games from bundles are tradeable or giftable. Steam's terms vary, so check the item description before attempting to send it.

UNDERSTAND

GIFTING RULES AND LIMITATIONS

To ensure a smooth experience when learning **how to gift games on Steam**, it's important to understand certain rules that Steam has in place to prevent fraud and unauthorized gifting.

Friends hip Duratio n

As mentioned earlier, you must have been

friends with the recipient for at least three days. This rule applies to direct game gifting but does *not* apply to Steam Gift Cards. If you need to send a game immediately to someone new, either use a gift card or wait three days after adding them as a friend.

Regional Pricing and

Currency Differences

Steam uses regional pricing to make games more affordable in different parts of the world. If you try to gift a game to someone in a different region, Steam may block the transaction or display a warning. In many cases, the game can still be gifted if the price difference is less than 10%. However, for larger gaps, the gift will not be

allowed. Gift cards, on the other hand, are region-locked - the recipient must have a Steam account registered in the same region as the card's currency.

Refunds for Gifts

If the recipient has not accepted the gift, the sender can cancel the gift and receive a refund. Once the gift is accepted, Steam's standard refund policy applies: the recipient can request a refund

(if they have played less than two hours and owned the game for less than 14 days), but the refund goes back to the original purchaser.

TIPS FOR A SUCCESSFUL STEAM GIFT

Knowing **how to gift games on Steam** is one thing, but doing it in a way that feels personal and thoughtful can make all the difference.

- **Ask about their wishlist.**

Many Steam users maintain a public wishlist.

Checking it ensures you buy a game they actually want.

- **Wait for a sale.**

Steam holds major seasonal sales (Summer, Winter, Halloween, etc.). Gifting during these periods can save you a lot of money.

- **Write a genuine message.**

Even a simple “Happy Birthday, hope you

enjoy this!” adds a human touch.

- **Consider a bundle.**

Sometimes you can purchase a bundle that includes multiple games, then gift the extras to friends.

- **Use the “Schedule Delivery” feature.**

This is perfect for coordinate d surprises or if you want the gift to arrive exactly on a special date.

TROUBLESHOOTING COMMON GIFTING ISSUES

Even with clear instructions on **how to gift games on Steam**, problems can occasionally arise. Here are fixes for the most common issues.

“You
cannot
gift
this
game

to this
friend”

This usually happens because of regional restrictions or insufficient friendship time. First, check that you have been friends for at least three days. If you have, the issue is likely regional. Try switching to a gift card instead, or ask the recipient to create a Steam account in the same region as yours.

“The

gift

was

not

received

d”

If the recipient didn't receive an email, ask them to check their spam folder. Also, confirm that the email address you entered is correct. If you sent it to a Steam friend, they can find the gift under their "Inventory" — specifically the "Gift Inventory" tab. They should also check the "View Pending

Gifts" section in their account settings.

“The recipient cannot

redeem the gift”

If the recipient already owns the game, they will be prompted to accept the gift anyway (it will be added to their inventory for later trading or gifting).

Alternatively, they can decline

the gift so you receive a refund. If the game is unavailable in their region, the redemption will fail and the gift will be returned to your inventory after 30 days.

GIFTING GAMES TO NON-FRIENDS : IS IT POSSIBLE?

While the most common method of gifting on Steam is through the friends list, you can also send gifts via email. This is especially useful when you want to surprise someone who is not yet on your friends list. However, as mentioned, the

recipient must redeem the gift within 30 days, and the email method still subjects you to regional restrictions. For recipients without a Steam account, a gift card sent via email is the best route because they can create an account and redeem the credit at their leisure.

CONCLUSION: MASTER THE ART OF STEAM GIFTING

Learning **how to gift games on Steam** opens up a wonderful way to share your love of gaming with others.

Whether you buy a specific title, send a flexible gift card, or pass along an extra copy from your inventory, Steam makes the process straightforward as long as you keep a few key rules in mind. Remember to check for regional compatibility, maintain a

friendship for three days when gifting direct games, and always add a personal message to make the gift truly special.

Now that you know the ins and outs, go ahead and surprise a fellow gamer with a gift they will cherish. Happy gifting!
